Datasheet Sun Fire V240 Server On the Web sun.com/v240

## Sun Fire<sup>™</sup> V240 Server

This rack-optimized, dual-processor system provides data centerclass availability in a 2RU package at PC pricing.

## Key feature highlights

- Rack-optimized, 2RU/25-in.-depth design
- Up to 2 x 1.34/1.5-GHz processors
- Up to 8 GB memory
- Up to 2 x 73/146-GB, hot-swap, UltraSCSI disks
- Three full-length PCI slots (1 x 64-bit/66-MHz and 2 x 64-bit/33-MHz)
- Redundant power supplies and power cords
- Comes with Solaris™ Operating System, remote management, Sun Java™ Enterprise System software, and a variety of I/O connectivity—all standard

## A Compact, Cost-Effective, Multiprocessor System in a Small Package

Powered by up to two 1.34-/1.5-GHz UltraSPARC® IIIi processors, the Sun Fire V240<sup>™</sup> server is an entry-level, data center-class server. It provides high availability and expandability in a compact, 2U package. Four autonegotiating Gigabit Ethernet ports provide multiple connectivity for high-speed, high-bandwidth networking, while hot-swappable, front-accessible disk drives and redundant, hot-swappable power supplies (with independent cords) further enhance the Sun Fire V240 server's uptime. With expandability features such as three PCI slots, up to four disk drives, and eight GB of memory, the rack-optimized Sun Fire V240 server easily scales to meet the needs of Tier 1 and Tier 2 applications. With a low-cost, integrated SSL option on the motherboard, the Sun Fire V240 server provides fast, secure Web transactions without sacrificing CPU cycles or a PCI slot. The standard System Configuration Card and serviceability features help enable quick upgrades and repairs, while the unit's Sun Advanced Lights Out Manager (ALOM) provides remote management to a large number of servers from virtually anywhere on the network.
